EFFECT OF CURRENT RATIO, DEBT TO EQUITY RATIO, AND TOTAL TURN OVER ASSETS ON LQ45 COMPANY FINANCIAL PERFORMANCE LISTED IN INDONESIA STOCK EXCHANGE (BEI)

ABSTRACT

By

Serly Puspa Melati

This study aims to determine and examine the effect of the current ratio, debt to equity ratio, and total asset turnover on the financial performance of the LQ45 companies listed on the Indonesian stock exchange.

This research is a quantitative study using secondary data in the form of company financial statements on the IDX in 2016-2018.

This study uses multiple linear regression test, coefficient of determination, F test, t test, and dominant test. The independent variable in this study consisted of current ratio (X1), debt to equity ratio (X2) and total asset turnover (X3) while for the dependent variable was financial performance (Y).

The results of the study show that the current ratio has a positive and not significant effect on financial performance, debt to equity ratio has a positive and not significant effect on financial performance and total asset turnover has a positive and significant effect on financial performance.

Keywords: current ratio, debt to equity ratio, and total asset turnover in financial performance
